

Researcher ID – Tips

1. Create a Researcher ID account (<https://www.researcherid.com/>)
2. Link ORCID to Researcher ID (see instructions below)
3. Populate your list of publications using Web of Science (see instructions below) or Google Scholar (instruction under development)
4. Maintain your list of publications quarterly
5. Provide BJI with administrator proxy (instruction under development) so we can help

How to Add Publications to Your ResearcherID Account

OPTION 1 – Using Web of Science (Recommended)

1. Go to <http://guides.lib.uwo.ca/az.php?a=w> and select Web of Science to sign in using your Western username and password for access

2. Once you are in Web of Science, select "Sign in" to log into your Researcher ID account

3. Once you have logged in, you can search for your publications
4. From your search results, place a checkmark beside your publications and choose **“Save to Researcher ID – I wrote these”**. You will find this in the export options

The screenshot shows a search results page with a dark header containing 'Search', 'My Tools', 'Search History', and 'Marked List'. On the left, there is a sidebar with 'Results: 6 (from Web of Science Core Collection)', a profile for 'Paquette Warren J', and 'Web of Science Categories'. The main content area shows three search results, each with a checkmark in the left margin. A dropdown menu is open over the first result, listing options: 'Save to EndNote online', 'Save to EndNote desktop', 'Save to ResearcherID - I wrote these' (highlighted with a red box), 'Save to InCites', 'Save to Other File Formats', and 'Save to RefWorks'. The first result is 'Case study of evaluation diabetes programmes used in the United Kingdom to assess quality improvement initiatives to enhance chronic disease care in indigenous communities in Canada: the FORGE AHEAD program protocol'. The second result is 'Developing community-driven quality improvement initiatives to enhance chronic disease care in indigenous communities in Canada: the FORGE AHEAD program protocol'. The third result is 'Impact of a quality improvement program on primary healthcare in Canada: A mixed-method evaluation'.

5. In a new tab, verify that the publications in your list are accurate by going to <https://www.researcherid.com/> and signing into your [Researcher ID account](#)

OPTION 2 – Using ORCID

1. Go to <https://orcid.org/signin> and [Sign in to your ORCID account](#) and your [Researcher ID account](#) in separate tabs <https://www.researcherid.com/>
2. In ORCID, select “+Add Works” then “Search & Link” at the bottom of the page. Select “ResearcherID” from the list of links

The screenshot displays the ORCID profile interface. On the left, there is a sidebar with profile information including the ORCID ID (0000-0002-2813-1315), a QR code, and various identifiers like country, keywords, and websites. The main content area is divided into sections for Education, Employment, Funding, and Works. The 'Works' section is currently empty, showing a '+ Add works' button and a 'Search & link' button, both highlighted with a red box. Below these buttons is a list of link wizards, including Airiti, Australian National Data Service (ANDS) Registry, CrossRef Metadata Search, DataCite, Europe PubMed Central, ISNIZORCID search and link, MLA International Bibliography, Redalyc, ResearcherID, and Scopus to ORCID. The 'ResearcherID' option is highlighted with a red box.

3. You will be prompted to authorize ORCID and ResearcherID to share publications between the accounts. If you agree, select "**Authorize**" (highly recommended)

The screenshot shows the ORCID logo on the left and the CMHR Program name and URL on the right. Below this, it states that ResearcherID has asked for access to the ORCID record. A list of permissions is shown: 'Read items in your ORCID record', 'Read your biographical information', and 'Add a person identifier'. A disclaimer states that the application cannot see the ORCID password or other private info. At the bottom right, there are two buttons: 'Deny' and 'Authorize', with the 'Authorize' button highlighted by a red box.

The screenshot shows the ResearcherID logo and Thomson Reuters logo at the top. Below, there is a section titled 'ORCID' with a message: 'You currently do not have an ORCID record associated with your ResearcherID account. Do you want to associate the ORCID record 0000-0002-2813-1315 with your ResearcherID account?'. At the bottom of this section, there are two buttons: 'Yes' and 'No', with the 'Yes' button highlighted by a red box. A copyright notice '© COPYRIGHT 2015' is visible at the bottom left.

4. You will then be prompted to select the information you would like to share between ORCID and ResearcherID. You can share profile data, send ResearcherID publications to your ORCID account, and retrieve ORCID publications to your ResearcherID account.

The screenshot shows the ResearcherID logo at the top. Below, there is a section titled 'ORCID' with a message: 'You have an ORCID associated with your ResearcherID. Data can be exchanged between your ORCID and ResearcherID accounts. More information'. Below this, a question asks 'What data would you like to exchange between ResearcherID and ORCID?'. There are three options, each with a 'Go' button: 'Profile data', 'Send ResearcherID publications to my ORCID account', and 'Retrieve ORCID publications into my ResearcherID account'. All three 'Go' buttons are highlighted by red boxes. At the bottom, there is a button labeled 'Back to My Researcher Profile'.

5. Once you are finished, verify that your publication list is accurate in ResearcherID.
