First Name

Last Name

Pronouns (e.g. he/him, she/her, they/them):

Preferred Email:

City of Residence:

Province/Territory of Residence:

▼ Alberta ... Yukon

Name of Institution or Affiliation (if applicable)

PREVIEW ONLY

Please select your knowledge user group (select all that apply):

☐

Person with lived/living experience (e.g., older adult living with a musculoskeletal condition)

☐

Informal caregiver (e.g., family member of an older adult living with a musculoskeletal condition)

☐

Community partner

☐

Educator

☐

Healthcare provider - Please specify type of provider:

☐

Policy or decision-maker

☐

Researcher

☐

Trainee (e.g., graduate student, postdoctoral researcher)

☐

Other (please specify): _____

Please complete the following questions to complete your Expression of Interest.

Please describe how your personal or professional experiences are relevant to the conference theme, and how you see yourself contributing to the co-design of the research action plan. The conference theme is focused on improving equitable access to rehabilitation services among older adults with musculoskeletal conditions.

(maximum 250 words, 1250 characters)

A central pillar to co-designing this research action plan is Patient Partnership (also referred to by other terms, including patient engagement). This includes authentic partnerships between researchers and diverse partners, including people with lived/living experience. Please summarize your experience in Patient Partnership **(maximum 250 words, 1250 characters)**.

Please address the following: What prior opportunities for partnerships between researchers and diverse partners (e.g., people with lived/living experience) have you had? If none, how do you imagine Patient Partnership will strengthen the co-design of this REIMAGINE research action plan?

To help us with planning please consider answering 2 additional optional questions.

How did you hear about this opportunity?

Please share any questions that you would like addressed by the organizers or facilitators during the conference below.

The Research Engagement Collaborative Alliance with Partners (RECAP)'s learning platform consists of three online modules that take approximately 30 minutes each, for a total of 1.5 hours to complete. The modules will help establish a common understanding and language related to research partnerships, the roles individuals can play, and ways to overcome power differentials when contributing or learning about multi-sectorial expertise, lived experience, and critical perspectives.

As a participant applicant, I agree to complete these learning modules prior to the day of the event.
